Satellite radio has been one of the best things to come along in a long time. As a person that drives a lot it is very hard to find a radio station and in some cases one clear enough to listen to. Satellite radio provides an exceptional value due to verity and programming. I understand AM and FM radio need the adverting money but listen to a radio station these days and compare how often you hear vulgar langue and excessive commercials. Please do not take the traffic and weather from Satellite radio because regular radio just can not provide the same quality service.
